

Siemens - Better Technology

Siemens Hearing Instruments are at the forefront of technological innovation, with more than a hundred years of experience in hearing instruments. The concept of “better technology, better design, better useability” came into play when looking for washrooms solutions.

“The washrooms are often the first point of call for our visitors. As such we wanted to provide a modern cost effective approach to hand drying for both staff and visitors”, said Lance Pelling of MED Finance & Commercial – Estates.

“We selected the unheated Jet towel for our main washrooms replacing messy paper towels with the obvious benefits to the appearance of our washroom and to the environment in general.

The energy-saving that Jet Towel provides was a bonus. Now the mess have gone. As a time and cost saving bonus, the clearing up has been reduced and no monitoring is needed.”

.

“The unheated version keeps running energy costs to a minimum.” Lance Pelling, Siemens Hearing Instruments
